First-Size Bulbs Produce Stronger Spikes and Larger Flower Trusses

The Best Size for Beds, Borders and for Growing Indoors
Beautiful and Fragrant

Our First-Size Bulbs measure (18 to 19 Ctm.) 7 inches and over in circumference. They are the best and most satisfactory for outdoor planting and for forcing in pots.

HOW TO GROW HYACINTHS

Outdoors: Plant bulbs during October and November in well drained garden soil, 4 to 5 in. deep and 6 in. apart each way.

Indoors: Use a 4 inch pot for 1 bulb and a 6 inch pot for 4 bulbs. A light rich soil is most suitable. Pot fairly firm and let the tip of the bulb just peep out of the soil. Water and place in a cool cellar or cold frame covering the pots with ashes or soil until thoroughly rooted. Never allow the bulbs to become dry. After eight weeks or until top growth of three inches has developed they should be ready to force in a cool, light room and after spikes are well developed they should be placed in regular room temperature. A succession of bloom may be had by bringing part of the planting into the light, at a time, as needed.

HYACINTHS—First Size Bulbs—18-19 Ctm.

	Per Doz.	Per 100
City of Haarlem. Soft creamy yellow	\$3.00	\$23.00

Oriental. Soft Havana, faint shading of violet	1.50	11.00
Mixed. A choice mixture of all shades	1.25	9.00

Tulips

Our Top Size Bulbs measure 5 inches and over in circumference.

HOW TO GROW TULIPS

Outdoors: Tulips do well in any good garden soil and can be planted anytime in the Autumn before the ground is closed by frost. Plant 4 to 5 in. deep and 5 to 6 in. apart each way.

Pot Culture: Plant the bulbs as early as possible, as upon the slow growth of the flower bud depends the success of the forcing. Plant 6 bulbs to a 6 in. pot in any good friable soil, allowing the tips of the bulbs to show above the soil. Water and place in a cold frame or heel-in in the garden covering the pots with ashes or soil and allow eight to ten weeks to force root development. Bring pots indoors as required and set in a cool, dark cellar. Never allow the soil to dry out. When an inch or more of top growth is made bring up to the light of a cool window, and subject them to gentle forcing. Never in a dry, warm atmosphere at the start.

IDEAL GIANT DARWIN TULIPS Top Size Bulbs 12 Ctm. Up

"None better" than Ideal Darwin Tulips. The big flowers are truly magnificent and without question superior to most of the Darwin Tulips. They belong to the May Flowering or late-blooming class. 28 to 30 inches tall.

Daffodils

We offer Top Size No. 1 Bulbs

Daffodils give a marvelous display early in the Spring and are lovely for beds, borders, and naturalizing. Stems are strong, stiff, 12 in. or more high. Ideal for pot culture.

HOW TO GROW DAFFODILS AND NARCISSUS

OUTDOORS: Plant in any good garden soil and can be planted any-time in the Autumn before the ground is closed by frost. Plant 4 to 8 in. deep and 6 to 8 in. apart each way.

POT CULTURE: Plant the bulbs as early as possible, as upon the slow growth of the flower bud depends the success of the forcing. Plant 4 bulbs to a 6 in. pot in any good friable soil, allowing the tips of the bulbs to show above the soil. Water and place in a cold frame or heel-in in the garden covering the pots with ashes or soil and allow eight to ten weeks to force root development. Bring pots indoors as required and set in a cool, dark cellar. Never allow the bulbs to dry out. When an inch or more of top growth is made bring up to the light of a cool window, and subject them to gentle forcing.

GIANT TRUMPET DAFFODILS

These ever-popular Daffodils have trumpets as long or longer than the perianth or the surrounding row of petals.

	Per Doz.	Per 100
Beersheba. Ivory-white trumpet, pure white petals. Beautiful formed flower	\$2.30	\$18.00
Emperor. Yellow trumpet, primrose petals	1.40	10.00
Golden Harvest. Largest trumpet, deep golden-yellow	1.75	13.00
King Alfred. Rich golden-yellow. Very popular. Round bulbs	1.40	10.00
Double nosed bulbs, Jumbo	2.20	17.00
Mrs. R. O. Backhouse. "The Pink Daffodil". Apricot-pink trumpet changing to shell-pink at the deeply fringed edge, ivory-white petals	1.95	15.00
Mrs. E. H. Krelage. Creamy-white trumpet changing to pure white; white petals	1.60	12.00
Rembrandt. Trumpet and petals pale yellow	1.40	10.00
Roxane. Pure white trumpet and petals	2.30	18.00
Spring Glory. Yellow trumpet, white petals	1.60	12.00

Landreth's Lawn Grass Mixtures

September and October are the Best Times to Plant a Lawn

The fall season is the best time to sow Lawn Grass Seed. The soil is warm and friable, with plenty of moisture from dews and rains, which not only hastens germination but enables the roots to become well established before freezing weather sets in. Competition from weeds is less, and root growth is well established before Spring.

Our Lawn Mixtures are composed of the finest varieties of grasses, each of which has its season of beauty, and the result of this blending is the production of a sod that is always evergreen and velvety in appearance.

QUANTITY TO USE—On new lawns sow 1 lb. of seed to 200 sq. ft., 5 lbs. to 1000 sq. ft., 100 lbs. per acre. For old lawns use half the quantity.

LANDRETH'S NEVER DIE

Treated with Arasan and Rootone.

This is the best mixture for a beautiful lawn. A perfect blended combination of fine bladed and deeprooted permanent and quick growing grasses. Sure to produce thick sod with a rich green color and a compact, smooth, velvety surface which, with proper care, improves from year to year. Lb, \$1.00; 5 lbs., \$4.75; 10 lbs., \$9.25; 25 lbs., \$22.50; 50 lbs., \$43.75.

LANDRETH'S EMERALD GREEN

Treated with Arasan and Rootone.

The finest of lawn grass mixtures, containing over 75% Perennial Grasses and over 95% Pure Live Seed. Treated with Dupont Arasan to protect against seed and soil-borne diseases and also with Rootone, a hormone stimulant that promotes faster germination, deeper, stronger root growth and thicker top foliage. This DeLuxe lawn seed mixture contains Kentucky Bluegrass, Bent, Poa Trivialis and Fancy Redtop. All fine-bladed grasses that will produce a beautiful lawn having a rich green color and a heavy, compact turf. Lb., \$1.50; 5 lbs., \$7.25; 10 lbs., \$14.25; 25 lbs., \$35.00; 50 lbs., \$68.75.

POPULAR

This mixture includes varieties of grasses best suited for the Southern States. Lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.75; 25 lbs., \$16.25; 50 lbs., \$31.25.

SHADY PLACE

It is difficult to grow grass in shaded places, especially under trees unless a special mixture of shade tolerant grass varieties are used. Our Shady Place formula contains a blend of those grasses which naturally thrive in the shade. It will quickly produce a fine sward, very compact, making a close sod, lasting in growth. Lb., \$1.25; 5 lbs., \$6.00; 10 lbs., \$11.75; 25 lbs., \$28.75; 50 lbs., \$55.25.

SEASHORE

A special mixture composed of permanent, fine bladed, strong rooting, grasses suited for seashore lawns. Top dress the sand with 4 inches of good soil and fertilize well. Lb., \$1.10; 5 lbs., \$5.25; 10 lbs., \$10.25; 25 lbs., \$25.00; 50 lbs., \$48.75.

NEW JERSEY LAWN MIXTURE

Formula No. 1 with Clover: Prepared in accordance with the formula recommended by the New Jersey State Agricultural Experimental Station, for sunny location. Lb., \$1.30; 5 lbs., \$6.25; 10 lbs., \$12.50; 25 lbs., \$30.00; 50 lbs., \$58.75.

WHITE DUTCH CLOVER
